Preface

The book “Health Expenditure, Outcome and Economic Growth” is the outcome of the deep interest and extensive research conducted by the authors. It aims to provide a clear understanding of the complex relationship among Health Expenditure, Outcome and Economic Growth in India as well as in the major states which are crucial for health policy formulation and development of social sector. The motivation for undertaking this study stems from a deep personal and academic interest in understanding how health expenditure impacts the socio-economic fabric of a developing country like India. This research work aims to provide fresh insights and empirical evidence that can benefit scholars, policymakers, and practitioners.

This book contains intellectually stimulating and enriching analysis with secondary data across states using rigorous econometric models like the ARDL approach. Writing this book has been both a challenging and rewarding journey. We have tried to present the content in a simple, clear, and well-organized manner for a wider audience. We hope this book will be helpful and insightful to all its readers.

We express our sincere gratitude to the academic mentors and researchers for their discussions and valuable suggestions for improving the quality. We are thankful to Mr. P. Biswogopal Jena, HR Manager, DPCL, Bhadrak, Odisha for cooperation in editing the manuscript of the book. Lastly, we are thankful to Empyreal Publishing House, an International Publisher for publishing and distributing the book in India and abroad.
